Gmail Notifier 2 Requirements: ✓ Requires Android 2.3 and higher. ✓ Free to use. Note: the Gmail Notifier 2 is no longer supported by google, but you can still enjoy our older version of the application, the Gmail Notifier. I prefer to use this and block the others in my firewall. To do so, I block the IP address. .as Andy Seska Feb 2, 2016 8 Google Chrome .as Andy Seska Jan 20, 2016 8 Google App Whenever I download an app from Google, my old app always gets deleted, even though I haven't deleted it. So if I were to download this one, and it decides to be a pain in the ass and try to delete my old app, I'm assuming I'd end up deleting it anyways. No reason why this app shouldn't work just fine though. Marco D'Alessio Jan

Gmail Notifier 2 • Supports monitoring of several accounts in one setup • Control, Delete and Show Notification Settings • Receive notification in the notification center • Configure custom notifications • View the summary of notification recieved and send • Support for auto reply • Configure notifications for all types of messages (incoming, new, replied, draft, sent) • The notification settings is saved and we have a backup and restore feature. • The notification settings is automatic updated when the app is updated. • You can set custom time to be informed about new emails (For which account) • The notification settings can be set for individual accounts • You can also see notification settings for all accounts from one place • You can switch off the notifications manually. • The gmail notifier 2 is upto date with all the features in the release version of google gmail. This is an unofficial clone of the android app 'g-mail notifier' by treenji86. Changes: 1. Added a handful of new features: 1.1) The main purpose of this app is to tell you about new emails in your Gmail. If you're on mobile or tablet and have another tab for email open, that tab will keep popping up and telling you about new emails. 2) You can now change the settings for the notification center, turn off the notifications when you do something important, and the number of emails you want to be informed about. The more emails you set, the less your phone will beep for each new email. 3) You can configure which messages should make a sound when you're notified about new ones. 4) You can specify when you want to get notifications. 1.2) Added a restart button in the list of notifications. 1.3) Click
