Using the date/time method The _date/time method_ of displaying images in the Image Browser is a useful way to see all the images in a project. It displays all the images from a batch of images opened at a specific time and date. To set the date, click Date to display the dialog box shown in Figure 5-2. FIGURE 5-2: Enter a date and a time in the upper left and click OK to close the dialog box and see your images. To add a time, enter one here and then click OK. Remember to change the system time if you need to display the images at another time. The time appears in the upper-left corner of the Image Browser as shown in Figure 5-3. The time and date of the pictures

Jump to Photoshop Elements details Adobe Photoshop is an award-winning digital graphics tool for editing, enhancing and publishing photos and other documents. It is the most popular graphics editing and design application in the world, created by Adobe Systems. Adobe Photoshop is famous for its integrated tools such as the Pen Tool, the Brush tool, the Selection tool, and the Lasso tool for precise selection and layer creation. The original Photoshop and Photoshop Elements combine this with advanced filters, adjustment layers, and drawing tools such as the Pen Tool, the Brush, the Shapes tool, the Magnifier, and the airbrush. Adobe Photoshop is used for many different purposes, including image editing and graphic design, creating videos, illustrations, maps, websites, logos, typography, and printed material. The latest version is Photoshop CC 2019, which was released in November 2019. It is the first version to support the iPhone XS and XR, iPad Pro, Google's AR Studio, new features in Adobe Stock, and Adobe Dimension. ), Yes, www.wpr.org) and true positive detection (from [bib5]), are averaged (within donor) to get the prediction $p_{\text{new-}i}$ for each gene. $SSp_{\text{new}} = \frac{1}{N} \sum_{i=1}^N p_i$ where i is the donor and N is the number of donors for the gene. Genes with $p_{\text{new-}i} > 0.5$ are considered to be upregulated in the context of the disease. Pathway analysis [25] ----- To determine biological pathways in which the disease genes are enriched, DAVID [bib1] was used. The pathway analysis was performed with all the known genes in the disease and all the genes represented in the microarray. Each of the enriched pathways was ranked based on the number of genes it has. A P -value and a Fisher exact P -value is calculated for the pathway. Data availability [26] ----- All data and materials can be accessed by writing to the corresponding author. Supplementary Information [27] ===== Supplementary Information is available at
