And you can add your own service status page to show the convert log You can set the job start time as your wish, so that your users are able to find the convert log easily Full support for batch convert, you can convert a large number of documents at the same time If any conversion error happened, this tool will send the error list to your e-mail for further analysis You can define your own PDF/XPS Converters on-demand, by installing corresponding convertible extension. In this way, you can setup one converter, it can convert the documents on-the-fly. You can customize your convert tool by adding your own parameters, just like the convert tool comes. It lets you run your convert process under windows service easily. And you can add your own service status page to show the convert log. You can set the job start time as your wish, so that your users are able to find the convert log easily. Full support for batch convert, you can convert a large number of documents at the same time. If any conversion error happened, this tool will send the error list to your e-mail for further analysis. Is the source code available for this tool? No, you need to buy it, even there is no legal source code of this software. If your source code is required, please contact us first. Will this software download all my documents when I install it on my computer? All the documents are only stored on your local network after you place the documents into the hot folder of AFP2PDF Transform Server. If you place a document into the hot folder of the server, the following steps will be taken: Reading the content of the document and decompressing it if it contains DLL files to store it into the hot folder; Modify the metadata and create the XML files and so on, if necessary; Executing the process; Saving the file if it's a success. After this, the server will delete the document and the server storage items related to this document will be expired. 09e8f5149f

AFP2PDF Transform Server Crack + Full Version

1. Converting AFP to PDF AFP2PDF is able to convert the contents of the AFP folder into PDF with user defined interface. It helps you to quickly archive your old photos into the PDF format. 2. Compressing the output PDF If you are using a paper-bound software, you are in the need for compressing the output PDF to reduce the size for long-term storage and distribution. AFP2PDF Encrypt the output PDF file to add security to the document. You can set the password for the output PDF document, so that unauthorized users cannot see the document. 3. Preview AFP and PDF files You can preview AFP and PDF files for file operation. You can even open up the output PDF document. Features: 1. Sharing the input folder Since AFP is a proprietary file format, it is not easy to transfer through Internet to other computer devices. With AFP2PDF, you do not have to worry about it. You can share the input folder to users as a network shared folder, and when they convert the AFP documents into PDF documents, the output will be saved in this folder which is easily accessible for users. 2. Compression You can compress the output PDF document to save disk space when you are using a paper-bound software or memory card. 3. Encryption Encrypt the PDF documents which is not compatible with the other software. 4. Command Line Command line options are also supported when you want to use the program locally. You can generate the GUI interface of AFP2PDF via command line. 5. Start/Stop Start and stop the AFP2PDF in command line. You can specify the start time and the server will run in a background. 6. Options You can customize the options as you wish. AFP2PDF will be designed for the desktop settings. AFP2PDF allows the user to set multiple output destinations. 7. Save as? You can save the output PDF document as an extension of the format. 8. Hide/Show & Delete output folder You can hide the output folder to prevent accidental output folder access. 9. Email the output PDF to Friend You can add email address for the owner of the folder so that users can email the output PDF document to the user. 8. How to use it? If you want to use the server, just install and register the program. If you want to use the standalone package, just unzip

What's New in the?
