File conversions can be done in one of two ways. For some people, the regular mode is more than sufficient, whereas other users want more control. The first mode consists of changing the extension of the video clips as the final file format. For example, the video can be set for a.avi extension, while the audio can be dropped down for mp3 files. Alternatively, you can select to add.mp4 or.ogv to the files. Convert videos with a single click You can also add a bit more in the way of options, such as the photo compression, the audio quality, the image format, and even the bitrate. For instance, you can shrink a video down to the dimensions of your choice, for example, down to 360x480 pixels. You can also set an image format and bitrate, alter the frame rate, and change some of the audio settings. You can also convert videos from the folders you select. It is worth mentioning that with this software, you can convert different video formats to each other, as well as extract the audio from a video file and burn it on a blank disc. To download this program you only need to fill out the survey or click on the download button. It is provided with a 30-day trial. Download Note More than once, I am sent around the web images and videos with strange names like "NV21.jpg", "XXX.mov", and so forth. If you find these images and/or videos on the web, it is not recommended to use them, as viruses and malware can be created from these image files. There are several links available which will take you to images without watermarks and may be safe for you to use. If you believe you are receiving that watermark image through a link, please contact me. From My Dropbox Note You will need to make sure that the image or video you are sending me is from your own personal account. Send image files directly to my email address: Photo Widget Right Click and choose "Save Link As". In Internet Explorer, choose "Save Target As". Note: This will take you to a screen where you can choose "Save Target As" or "Save Link As". (save it to your desktop/documents folder. It will look like a.zip file). Zip files are compressed, so make sure you choose the correct location, not your desktop. If you use Firefox, choose "Save Page As". Drop files directly into this folder: Documents/PhotoWidgetsV2/files/temp/# Links To send a link to my Dropbox/Google Docs account, copy the link and paste it into the address bar of your browser.
