If you have used other simple programs to create videos before, you will not encounter difficulties, since the interface is very similar to the Windows Movie Maker interface. However, unlike Windows Movie Maker, it is not completely free. If you choose to use this software, you need to pay to access more features. However, if you want to create a video using simple tools, you can try this free tool. Step 1 Open the free video editor by typing "video.com" in your browser's search box and then click "Get Started". Step 2 Click the "New" button. A new window will open.
