DivX is the world's most popular and powerful way to enjoy DVD movies on your Windows PC. DivX home movies have sophisticated, impressive features, including high-quality video and audio, frame-by-frame control, amazing surround sound, DVD menus and subtitles, and a wide selection of codecs and video-quality settings. DivX in a box is free and open source, and includes DivX Pro (advanced) versions of DivX Plus, DivX Plus Extreme, DivX Pro, and DivX Pro 5. DivX home movies can be recorded to any DVD-ROM drive on your Windows computer, or transferred to a DVD burner for real DVD output. To learn more about DivX and its

capabilities, check out DivX official Web site at www.divx.com. Video Editor Features

- Video Editor: Burn a video from files with audio and subtitle files for your own personal use. Edit videos and add or remove video, audio and subtitle streams to create videos or split files.
- Quicktime Plug-ins: Transfer DivX video to QuickTime for editing and web distribution.
- Pan and Zoom: Quickly pan to a point of interest within your video. Zoom in and out using the built-in pan and zoom controls.
- Subtitle Editor: Cut, copy, and paste subtitles by time and position within your video.
- Scale: Increase or decrease the displayed size of each video frame for fine-tuning video resolution. This feature is ideal for scaling DVD media (up to 640x360), and for making high-quality

video files for the Web. • Create Encrypted DVD and CD: Compress DVD video to a DVD title in your choice of standard or high video quality. • Special Effects: Special effects can be added to and removed from your video to create interesting video effects. • Tilt Shift Lens Control: Shifts the video image plane in one dimension, similar to a tilt-shift lens. You can control the amount of shift applied to the video. • Add Background Music: Add background music to your video up to 4 hours of audio at one time. The music can be audio CD tracks, MP3 files, or synthesized sounds. • Background Audio Control: Create a custom background audio effect by adjusting the volume, gain, panning and blending of your audio. Background audio can be

combined with your own or downloaded stock sounds or music.

What's New in the Bombono DVD?

Bombono DVD is an authoring tool whose purpose is to help you create or burn DVDs that include videos, songs, picture backgrounds for menus, and chapters. Importing options The tool gives you the possibility to create a list with the videos that you want to be included on the target DVD. Clips can be imported using the built-in browse button or drag-and-drop support. What's more, you are allowed to add still images (e.g. PNG, JPG, BMP) which are used as menu backgrounds, and audio files like MP2, AC3, and DTS file format. Plus, you may insert videos from DVDs.

Chapters and other video-related tweaks Bombono DVD gives you the possibility to design chapters with multiple points, specify the exact position of a chapter point via a timeline display, delete all chapter points or only the selected ones, mux audio and video streams into a single file, as well as add points between a custom time interval. You may transcode videos, capture frames and save them to a file on your computer, rename videos, automatically adjust the bitrate to the disc or make use of a built-in bitrate calculator for accurate results, and set the action which is triggered at the end of each clip, namely automatically play the next clip, play the text clip, or play all of them. Menu customization settings Bombono DVD helps you create menus

with user-defined names, change the background color or import images, configure the menu duration (in seconds) and play an audio file in the background, as well as select the ending action (loop or play all clips). In addition, you are allowed to insert custom text which can be altered in terms of font and size, and embed various types of shapes (e.g. check, diamond, hexagon) where you can write custom text messages. The shapes can be dragged and dropped to the desired menu position. Output parameters You may save the DVD content to a custom DVD folder on your system, write a disk image with a custom label, and burn data to DVD. Projects may also be saved to a file on your computer so you can import them in the future. Bombono
