Ltd Platform: Windows, OS: Windows 7, Similar News.Parkinson's disease: a search for systemic hormonal influences. Tight regulation of blood glucose levels has recently been shown to be of major importance for maintaining glucose homeostasis. The hormone insulin plays an important role in this regulation. We therefore investigated the possible role of insulin in the central nervous regulation of blood glucose homeostasis and striatal dopaminergic neurotransmission by testing the effect of systemic insulin administration on circulating glucose levels in patients with Parkinson's
