The process went fine but the ISO file that I made still ended in a.dmg extension. When I created my ISO I told it to make a ISO with my main hard drive (/dev/hda) but in addition to that I wanted it to make a second hard drive (/dev/hdb) and make a file structure on that second hard drive for an application I have. The ISO ended up with the files but the filesystem is formatted as /dev/hdb. I want to format it as /dev/hda since that's where my main hard drive is. When I tried to make the ISO it said that there was no hard drive, only a filesystem. The only way I was able to do this was by using the windows bootcamp to make a partition on my main hard drive and then put the files on there. Is there a way to have it make a file structure on /dev/hda and copy the files over to /dev/hdb? A: cd /dev/hda1 # not necessary mkdir /mnt/stuff cd /mnt/stuff mount -t ext4 /dev/hda1 /mnt/stuff cp -rp *. Many people were predicting that Jeffrey Epstein would plead the Fifth Amendment. It's at least the second time the hedge fund manager has taken the Fifth. But it's actually his second time doing it in the same month. Epstein was arrested August 9 at Teterboro airport in New Jersey. He has been charged with one count of conspiracy to commit sex trafficking of minors and one count of sex trafficking of minors. He had just landed at his private plane on the private tarmac at Teterboro. The arrest came just days after The Daily Beast reported that Epstein was supposed to plead the Fifth at his bail hearing. The first bit of news about the PlayStation 4 was that it was a next-gen console. Then, two days later, they announced that the console would be available on November 15th of this year for $399. Now, with E3 set to kick off next week, Sony has unveiled a bunch of new announcements, the first of which is the price. Not only will the Playstation 4 be available for $399 next month, but a version for $349 will also be available. Both versions will be out this fall. The console will be available for pre-order by the end of June with the $399 version coming in November. The more budget-friendly version (what I assume is cheaper, due to the lack of a hard drive) will come out in the fall with a price tag of $329. The PS4 will have the same DualShock 4 controller that the PS3 used, and a dedicated motion controller. Unlike the PS3 and PS Vita controllers, however, this controller will not come with any triggers or face buttons. The PS4 will feature a built in
