About us: Extreme Real Reality is a game made by a few friends in our spare time. We currently have no idea how or when it will ever see the light of day. So we are just in the testing phase. So if you find any bugs we can't fix we won't be around to fiddle with them. What we want: We do not care about the platform you use to play the game. Windows, Linux and Mac all work on this version of the game. If you like the game you may comment on it or try it. We like to know that others like the game. If you don't like it, feel free to go to hell. That's the only place left where you can get away from this game. If you like us or think we can do things better tell us, we do want a hug. INSTALLATION: Unzip the file into your Steam games folder. Create a new folder and copy the files into it. Steam should automatically update and run the game. Version Information: We are currently working on version 0.0.4. There is actually a 0.0.4x version included in the zip archive of the game. This is simply a pre version. It works the same as the main version but is not updated automatically. The main version has the correct version numbers after it. You can use the main version to test everything if you want and see the development. If you want to install the pre-release version you should unzip the main version into your Steam games folder and just remember to install the version after that. THANKS AND SUPPORT: We would like to express our thanks for all the support and comments received to date. It is great to hear how people are enjoying the game. If you can let us know how you liked it that would be much appreciated. We do not care if you post on our site or on Facebook. All information is appreciated. Pretty much every trope, but especially the one that Mario gets people addicted to Super Mario: like when you play the game is like 10 times more fun when you get friends together. I know that's not a thing either, but there's this personality test where you're suppose to figure out if you're introvert or extrovert and I'm an extrovert.I decided it was my time to do something, so I joined this game-dev forum and started posting to see who else had this geneious self-

- **Nintendo Sports Game Description: One of the most successful, entertaining and remembered series of all time, Nintendo Sports is back from a decade hiatus to take on the long time Sony and Nintendo console dominant sports titles on cell phones and consoles. We sit down with Nintendo to talk about the long awaited return as well as the latest mobile version of the classic. How did I get started in video game journalism? I came to work for Nintendo as a Nintendo reporter when I was 17 after being denied entrance into journalism school. I graduated from the University of Maryland at College Park at the same time that I started my job as a staff writer for Nintendo Fun channel's esteemed Upcoming section which still exists today as Nintendo Life and Nintendo Everything. I was fortunate to have interacted with Nintendo's internal PR and Marketing teams as well as the independent Nintendo developer community while I was there and got a real feel for how the industry worked on the inside. I was never a "Nintendo fanboy" before joining Nintendo, and for that I'm thankful and glad that I came to work with the legendary company as my full time job. That, and I remembered a lot of the game and felt in love with the way sports titles have always been executed with games like Nintendogs and Super Mario Run. My favorite sports game is certainly Nintendo Sports Dream League Tennis, and I'm incredibly happy to see that it's coming back as NBA 2K League will be coming to the 3DS. I have been a big fan of Nintendo sports ever since I was a kid and I was so glad to be able to bring my great interest to Nintendo. And boy, what a ride. First question is: When did you get started with Nintendo? When I started writing for Nintendo in 2004, I was a college senior and I was confident enough to grow my own line of articles, writing critiques of the Nintendo Entertainment System, the Wii, and my own thoughts about the up and coming Nintendo 3DS and its games. I was one of the only reporters working for the decade at the time, and I was very happy to be working for the company. I left for Nintendo in 2010 when I was headed for law school but I was convinced by a friend to enroll for an MA program about working for the video game company. What is it like working at Nintendo? Any school that is about fun, sports and playing creates a unique atmosphere at any company it takes place at, so I**

Welcome to Heaven's Feel, a world in which the goddess Amaterasu has been reincarnated into the human world, and the sequel of the last game. You are guided by the Half-Genji, a man with a strange and dangerous power who has also begun his mission to destroy this world. This is the third collaboration between Gust and I've deeply beloved the previous titles, so it's with great pleasure I present to you Gust's "Street Fighter V". Street Fighter V: SFA-EX **Customization is available for all characters** **All costumes have their own bonuses** **You can change your costumes at any time** Character Info: Kasumi (Mametchi) Custom Costume: Kasumi comes to the world of the "Elites" (aka dojos) in hopes of uncovering what happened to her twin brother, Ryu. Along the way, she finds out that he has been adopted by a mysterious man who she soon realizes is Shun'ei, a master of the arts, and he became a member of this mysterious organization with no name. While visiting an art museum, Kasumi meets Leifang, and he teaches her how to fight "the arts" under the guise of a sparring match. After she defeats Leifang, Kasumi discovers she can summon her sibling into her hands. But little do she or Leifang know that she was created as a weapon to attack Shun'ei and the "Elder". Leifang: Leifang is a young man who looks a lot like Kasumi. His fighting style is similar to Kasumi's, but he utilizes "Karakuri", his form of art. His father is Nobunaga Oda, and his mother is a spirit who resides in the sky. The "Elder" (Oda) The "Elder" is Shun'ei's dad and the main antagonist of the game. He is a master of the "art" who has been working toward the final stage of his masterwork, "Okoi", for some time. "Okoi" is a weapon that has the power to bring legends back to life. It is made from an old dead god's head. Another mysterious organization known as the "Ranma" was created by the "Okoi" and owns the "Legend" (aka "Street Fighter
