PERSONAL RECOMMENDATIONS Hello there!

Thank you for reading my review. I hope it is

useful to you! When you reach certain

conditions, such as when you develop a soul

(personality) or raise your level (power), you

can unlock new stories in the game. By

exploring new stories, you can get new

equipment and skills. You can enjoy the

story as you wish, but there are also times when you can only explore the game without the option of choosing what happens next. In that case, you can get information about the "player" (you) and other players by returning to your destination. You can also talk to other people by traveling to towns and talk to the NPC's that appear on the map. If you visit a certain NPC, you can set up a relationship. If you cannot, you can carry out "dirty deeds" that are not good for your relationship. If you finish the story, the relationship will be left open. If you do so, you will be able to enjoy the "whispered story". There are also times when the system that automatically selects the next event will choose something difficult. It's probably best to have a higher level to avoid setting off the event, but if you do want to experience it, you can set it up beforehand. That said, I had a great time discovering the story! You can also do so if you play with other people, who will appear as your acquaintances when you talk. Best Regards,
