Are there any characters that I'm missing? What about 2K Sports' Pro Evolution Soccer series? What are my choices, and why do I think they're right? Other than the above, everything I've asked about in the past has been answered. There are no changes to the game that I didn't already know about. To put this in perspective, the only FIFA change from year to year in recent memory has been some slight physical improvements to a player's appearance. FIFA Ultimate Team has improved Huge improvements have been made to the FIFA Ultimate Team mode. It's been entirely rebuilt, and the changes are truly massive. Loading screen FUT Connect is improved A big difference is that players are no longer limited to three FUT packs on a single team. They can now select 11, 16 or 22 packs. When you first start a FUT match, there's now a loading screen before the match, which is very welcome after years of loading screens. More welcome is the fact that this screen isn't just a blip, but a tutorial that takes you step-by-step through one of the three new tutorial modes. In case you're wondering, there are three new tutorial modes in FIFA 22. They cover the following topics: Card Career: A mode with mostly FIFA Ultimate Team mechanics, which instructs you step-by-step how to complete specific goals, such as sending cards from packs to other packs, preparing the perfect plan for a game and building a team for a manager. The above tutorial in FUT Career mode Creative Intelligence: A game mode where two teams (or more) go against each other in a series of 1v1s to complete goals from a specific leaderboard, and where your team's goal count defines your team's achievements. PlayStation 4 / PS3 / PS Vita: AOE4 AOE4 Short for 'Asteroid', the AOE4 mode is a brand new game-type that sees one team attempting to hit a stationary target using their player-controlled spacecraft, while defending against an attacking team. If a defender is hit by a striker's alien ship, the striker will be given the opportunity to simply score, or use a special strike that will leave the defender open and vulnerable. But this can be avoided by the defender shooting at the striker's ship, which will damage and eventually destroy the alien ship. If the player hits the target, they'll trigger a knockout and the game is over. The more players the striker kills, the bigger the stun on the defender. When a striker wins the target battle, they'll take control of the defending ship for the remainder of the match. If the striker dies, the ship will leave the player in sole possession of their ship, but will always return to the position of the last controlled ship. AOE4 is one of the brand new game-types for FIFA 22, and will be added to the following game modes: – Career Mode (starts from the newly introduced Challenge mode) – FUT Champions – FUT Draft – The Journey PlayStation 4 / PS3: Challenge Mode FIFA 22 Challenge mode delivers more authentic and interactive entertainment through the use of integrated motion sensing technologies in all of the game modes.
