The Māori elder Te Rama Māramatua (1895-1951) was a poet and theologian who lived and worked in New Zealand. Te Rama's poetry embodies the struggles of life in the bush, particularly through the experience of living with Tuwharetoa, a homeless man, for five years. Within his work, he made clear his understanding of faith, conversion, whakapapa, the place of worship and the concept of the sacred: 'a sacred space of transformation and renewal, where whaikorekore is created and mana is restored'. His work also has much to say about the natural world, and how it affects us, yet it never refers to a 'world' beyond the human. Te Rama's poetry, while more formally traditional, was written in English and was intended for a contemporary audience. It's said that edit will improve a "bad" question. However, what are the most common cases when edit is not a good idea? Such as, a question with 1 single down-vote, that possibly has a typo, or a question that didn't get attention (comments disabled). Does it impact future edits of that question? i.e. if a quick edit would increase the quality, what are the chances it will get approved/get recognized? A: I'm guessing it's the same as adding a bounty. If you offer the same or more reputation to the question and it's accepted, you get the extra rep for free. If you keep offering up the same amount of reputation but the question gets down-voted, it can be removed by the community. But that's only if the question is fit for the site. If it's not, you can't force people to spend their time on it. If it's just a typo, you can at least ask the OP in the comments to correct it and that's it. You may even get a chance of retracting the bad question and asking for more details on what you did wrong. } else { if (isOpaque(alpha[0]) && isOpaque(alpha[1])) { int[] pixels = new int[4]; pixels[0] = (alpha[0] * deviceBitmap.getPixel(x, y)) >> 8; pixels[1] = (alpha[1] * deviceBitmap.getPixel(x, y)) >> 8; pixels[2] = (r * deviceBitmap.getPixel(x, y)) >> 8;
