Too many images are created with low-quality photographs and basic technology. Choose a photo that suits your needs and that represents the best image to create the best print piece. Photoshop is the most commonly used software used to create Adobe Photoshop Elements, a new edition of Photoshop suitable for everyday use by beginning users. You can begin to use the program at your leisure and build up your skills over time. Hundreds of tutorials available There are dozens of tutorials on the Internet for Photoshop. The most popular tutorials come from the Adobe educational sites at [www.adobe.com](http://www.adobe.com) and [www.photoshop.com](http://www.photoshop.com); the [`Adobe TV` channel at www.youtube.com/AdobeTV](http://www.youtube.com/AdobeTV); and the [`PowerShot` Facebook page at www.facebook.com/powerphotoshot](http://www.facebook.com/powerphotoshot). The quality of the tutorials varies greatly. Some are simply animated slideshows or step-by-step demonstrations. Some tutorials take you step-by-step through the creation of a composite photograph from hundreds of downloaded images. Other tutorials are simply about making a certain image look better through the use of editing techniques such as cloning. When you begin to do more photo editing, the videos by Richard Harrington ([www.youtube.com/user/KarenRHarrington](http://www.youtube.com/user/KarenRHarrington)) at the CreativePotentials site are outstanding. You can find tutorials on how to use Adobe Photoshop for making T-shirts from all over the world. Kip McGuire ([www.youtube.com/user/KipMcGuire](http://www.youtube.com/user/KipMcGuire)) has a tutorial on how to create a photograph of a coffee cup and a pen, where the eye draws a path through the cup and the line goes into the pen. Find out how to turn a pen into a flower. Check out Jesse Powell's free tutorials at [www.youtube.com/user/thejenkinsfiles](http://www.youtube.com/user/thejenkinsfiles). Powell is a well-known photographer who has a free tutorial on 'shopping' (creating a new photo from an old one), along with many other demonstrations. Up the ante As with many other software programs, Photoshop has a built-in repertoire of filters that enable the adjustment of color, tone, and other image attributes. Photoshop filters are great tools for enhancing images by changing the appearance of photos using the color palette. You can choose from a huge range of options, and many of the filters are very easy to use. The most popular filters are the

If you are an ardent Photoshop user you will find that Photoshop Elements is a great upgrade for you. It is perfect for beginners, hobbyists, and anyone who is looking to expand their computer's ability to create and edit digital images. In this Photoshop Elements tutorial, I will teach you how to create a nice rose from scratch. We will start by using the Pen tool to create a rough outline of the form. Once we are happy with our drawing, we can start painting with a regular brush. Photoshop Elements Tutorial: Create A Rose From Scratch Note: You will not be using Adobe Photoshop in this tutorial, so click on the picture to enter the website. 1. Create a new document. Start by creating a new document. In this example, I will use the paper size of 5 x 7 inches. 2. Start drawing the rose. Use the Pen tool to draw the outline of the rose as shown in the image below. You may notice that the shape of your pen tool is very different than the one on the left. This is because the Pen tool is the same on all Creative Cloud applications. So, the first thing we need to do is change the Tool Presets. To change the tool presets, choose the dropdown arrow in the top right corner of the application. This will open the toolbox. Make sure the Pen tool is selected, then click on the "More Tools" tab on the top left. You will see a list of tool presets. The last one is "Create Pen Path." This is the default tool preset of the Pen tool. Click on "Create Pen Path" to open the tool preset options. First, uncheck "Create Pen Path". Then, under the "Pen to Path" option, check "Create freeform path." Once you are happy with this setting, click OK. 3. Create a new layer and start coloring. A new layer will appear at the bottom of your artboard. Choose a soft paintbrush. Click with the brush and start drawing in different shades of red, green, and yellow. In this example, I will be using the colors of a rose. 4. Add details to the flower. If you look closely, you will see that the rose has a very rough outline. This is because a681f4349e

Q: Rails pass data from model to view How can I pass data from the model to the view, using a form, so that when the form is submitted the data is posted and saved? I am a Rails Beginner and I know that there should be some way to do that without using Javascript. Say the model is class Product attr\_accessible :name end and the controller is class ProductsController A: You should use ajax to save data. In your ProductController: def new @product = Product.new @product.user = User.new render :show end def create @product = Product.new(params[:product]) @product.user = User.new respond\_to do |format| if @product.save format.html { redirect\_to @product, notice: 'Product was successfully created.' } format.json { render json: @product, status: :created, location: @product } else format.html { render action: "new" } format.json { render json: @product.errors, status: :unprocessable\_entity } end end end In new.js.erb: alert("Product was created"); And don't forget to add proper headers and referer in create action: def create @product = Product.

A California bill that would expand the types of medical conditions that qualify for Medi-Cal, the state's Medicaid program, has passed the state legislature and now heads to Gov. Gavin Newsom's desk. SB 490, introduced by Sen. Scott Wiener (D-San Francisco) in January, would expand Medi-Cal's definition of disability to include specific, developmental or mental health issues — and that would help more people to qualify for coverage. “While more and more Californians struggle financially, more than one million people in California already have Medicaid coverage but have long-term, developmental, or mental health conditions that make it difficult for them to work,” Sen. Wiener said in a press release. “We need to bring relief to these Californians by expanding the definition of disability under the program.” According to a study by the Urban Institute, more than one million Californians — roughly 6 percent of the state's low-income, nonelderly population — receive some kind of coverage through California's Medicaid program, but about half of them are not covered for a disability. The study found that a \$13,000 income threshold is needed to qualify for Medi-Cal, which is the California version of Medicaid. The bill, which passed the Senate on a 21-13 vote and the Assembly on a 67-23 vote, is expected to receive a signature from the governor. California has long been the most generous Medicaid state, covering about 1.2 million residents, nearly a third of the national total. But about 350,000 people, or 21 percent, are not covered because they lack a disability and are not impoverished enough to qualify for financial assistance under the federal Supplemental Nutrition Assistance Program, according to the Urban Institute. The bill has support from the state's major labor unions, and from groups, like Disability Rights California, that advocate for disabled people. “Let's give all people a fair chance to lead productive lives,” said Anna María Farias, executive director of Disability Rights California, in a statement. Backers of the bill contend that expanding the definition of disability will help lift people out of poverty and lead to improved health care. “It's totally backward to say that people with disabilities are of lower quality, and you need to prove that before you give them health care,”
