When they had kindled a fire in the middle of the hall, and had eaten their meal, Jesus was taken away, and a den of robbers, and they gave him up to the high priests and to the elders and the scribes. And they led him away to the hall of Judas, named after the Galilean who was numbered with the sons of reproach, and with his band of traitors they cast lots, that he should be stoned. And when they had mocked him, they took off his clothes, and put a foul linen cloth on him. And the other inscription says: John 19:16, 17, 18 And the other inscription says: -Chapter 18 verses 22-24. And they also crucified two robbers with him, one on his right hand and one on his left. And the scripture was fulfilled, that they said, 'This man proclaimed himself a king' (Luke 22:69). Some time, after, the high priests adi to him, 'Are you the king of the Jews?' And Pilate answered him, 'You have a king, but you would not give him to me.' And the inscription on him said, 'Jesus the Nazarene' Then Pilate wrote the title on the cross itself, and the letters were known. And the chief priests of the Jews were saying to him, 'Do not write, but, 'The King of the Jews'. A small bag of haemospermum contains a seed and stamens Jesus answered, "My kingdom is not of this world."

I have tried with below code but it is giving exception for smtp mail id. var smtp = new SmtpClient { Host = "smtp.gmail.com", Port = 587, DeliveryMethod.Network, UseDefaultCredentials = false } Using the code I am getting below exception. A first chance exception of type 'System.ArgumentException' occurred in System.dll I got exception on Host = "smtp.gmail.com" line. The exception message is "Error occurred while sending mail and system returned an error code.". Please anyone let me know what i am doing wrong. A: It seems like you are using google Apps for work, which is unfortunately one of the most difficult mail services to work with. Your best bet for reliable email delivery is to have a service like mailgun handle your email and send to gmail. Once you have it set up send a test email to your address and make sure the receipt receipt emails. If you get no receipt then your mail is probably being flagged as spam. Debug AnyCPU 2.0 {DAD8CDE5-D8BC-4F7D-8F10-86C65AB920E1} {349c5851-65df-11da}
