The King Air is a VFR (Visual Flight Rules) single engine aircraft that is similar to the Beechcraft Duke. It was developed in the 1960s from a single engine Beechcraft C-12 Huron and first flew in 1968. It is an instrument-only aircraft with a fixed tricycle landing gear. The same simulators as you have come to love from Pilot Patented Technology (PAT) are used to create this beautiful and highly realistic aircraft. All of the new features include, 3D gauges, and amazing sounds, lights, animations, and realistic flight dynamics! The Livery is fully-customisable including: windscreen, tail section, cabin windows, tail accents, splitter, and more. You can create the perfect flying masterpiece for your home cockpit. Key Features: Modelled in the same way as the award-winning C90B King Air. All of the new features including 3D gauges, and realistic flight dynamics. Add-on makes it easy to travel between FSX and Prepar3d. New liveries includes: Green, Red, Blue, Yellow, and White. FSX Steam edition includes: Parachute & Smoke System. Checks your aircraft for damage Fly it to one of several destinations. RTP (Restart To Point) - allow you to fly a fully functional aircraft to an airport. Press ESC to pause (pause will not be saved in game) Hover over your aircraft to move in and out of the hangar Repainting your aircraft with custom liveries and colours.
