Development of three-dimensional modeling of dental implant-abutment system and evaluation of abutment screw and cylinder torque on fixture loosening of single crowns. Abutment screw/cylinder torque is an important factor in the loosening of dental implants. However, there have been no clear guidelines for determining the optimum torque for an implant-abutment-implant fixture-crown system. The purpose of this study was to develop a three-dimensional (3-D) modeling of an implant-abutment-fixture system using computed tomography (CT) images and to evaluate the influence of the abutment screw/cylinder torque on fixture loosening of a single crown. A total of 40 patients in whom dental implants were planned for single crown restorations were selected. CT images were obtained for each patient; these images were used to construct a 3-D model of implant-abutment-fixture. Implant failure was defined as any fixture loosening requiring replacement. CT images were used to construct the 3-D model of implant-abutment-fixture, and then the following were measured: 1) primary abutment height (in mm); 2) axial abutment screw/cylinder torque (in Ncm); and 3) absolute incidence of fixture failure. If the absolute incidence of fixture failure was less than 10%, the screw/cylinder torque was determined to be adequate; if the incidence was 10% or more, the screw/cylinder torque was determined to be inadequate. The screw/cylinder torque of 21 fixtures was considered adequate and that of 22 fixtures inadequate. The incidence of fixture failure was not statistically significantly different between the 2 groups ( $P = 0.164$ ). These findings suggest that a screw/cylinder torque of less than 30 Ncm is recommended for the single crown implant-abutment system. Wedding dresses that stand the test of time are the ones that were made with the care and concern of the bride in mind. Don't be fooled by those cheap dresses that can be tossed around on a windy day. A gown you choose should be the one you will want to be wearing again and again. Gowns can be very expensive these days. You may want to think about trying on a few dresses before
