LOGGING IN Quark3D at NAB 2012 Quark3D takes a different approach to tools development. Its core functionality is available as a 3D Web Application, packaged as a web application. Quark3D is a browser-based application (and so can be used with any browser on any device) with the core functionality being managed in a 3D Modeler environment. Key features include: 3D: An intelligent web based Design Application with structured 3D models. Its operation is much more like working with a 3D CAD program than a web-based CAD editor. Simulation: Create a model of the (shopfront) building, move furniture, colour the brickwork or place the lights, and then simulate with the interactive 3D simulation to see what the model will look like in the real world. Collaboration: A collaborative, content-based platform with everyone working on the same model from a centralised point. The Quark3D Studio is powered by the Crytek Visualisation Framework (CVF), which is an industry-standard framework for 3D production and content creation. It allows developers to build plug-ins for the CVF to create any number of features, including volumetric effects, camera control, and render engine technology. The Quark3D Studio also allows 3D Studio users to develop their own CVF plug-ins. Quark3D Studio is being used across all types of projects, from crowd simulation to architectural modelling, simulation-based production, virtual reality and online play. As a web application, the technology is available to anyone with access to a browser. For more information about Quark3D visit [quark3d.com](http://quark3d.com) or follow @quark3d on Twitter. About Quark3D Based in Barcelona, Quark3D is dedicated to the development of intelligent 3D tools, particularly for the industries that use the 3D environment the most - Entertainment, Visual Effects, Architecture and Interior Design, 3D Modelling/ Simulation, Product Design and Military Training - and also to the 3D Web. The company was founded by Javier Arias, best-known for his work on the VFX and movies such as Gladiator, Avatar and Hellboy.
