Some wireless communication apparatuses used to connect to a network are provided with a wireless communication mode switching function to allow the wireless communication mode to be switched from a wireless LAN communication mode to a wireless communication mode used to connect to a broadband wireless communication network. For example, Japanese Unexamined Patent Publication No. 2005-5390 discloses a technique in which a wireless communication mode to be used for wireless communication is changed when the communication speed is insufficient when wireless communication is conducted between a wireless LAN terminal and a broadband wireless communication terminal.Description This ambitious project started in 2013 with the idea of exploring the innermost side of the Greek people and the reality of this anti-heroic country.
