5 Effective Social Media Marketing Stats to Watch in 2019 The Internet has a certain personality. You have the SEO people, you have the content creators, you have the social media strategists, and then you have the analytics people. There are people who manage their own social media marketing campaigns, and there are people who specialize in analytics. It's easy to get your head in analytics, but it's more difficult to remember the names of the people and companies that you work with, let alone keep up with the latest stats and updates. I'm no different when it comes to personal social media marketing. I make sure to follow those people who focus on content, but I also check back here to keep tabs on the latest analytics from social media platforms and online platforms in general. I'll update this list throughout the year to keep tabs on the winners and losers.

Social media users and brands: Here's one stat I find most interesting. According to Nielsen, 41% of Internet users follow brands on Twitter. That means that Twitter is a powerful marketing tool for brands, and for influencers to drive their name recognition and online reputation. The question is, what percentage of brands are using Twitter to their best advantage? What percentage of brands are only hanging out on Twitter but aren't using it effectively? I don't think it's too far of a stretch to say that if social media users are only 5% of total Internet users, then Twitter users comprise at least 5% of this figure. Obviously, this doesn't mean the other 96% of Internet
