Plants Vs.Q: How to remove a used git branch? I've been working on a project I started back in June 2011 on my MacBook Pro and then accidentally killed my machine completely while I was away. I have successfully cloned my old project from the git server again and am trying to make a new branch from the last commit from my new project. I'm almost there and have made a new branch named "new" and am just about to git push from my "new" branch to the old project git branch, when I see this error: A branch named 'new' already exists. ... ... To git@git.codes.server.com:username/projectname.git ! [rejected] new -> master (fetch first) error: failed to push some refs to 'git@git.codes.server.com:username/projectname.git' I'm confused. If I wanted to make changes on my computer and then just use a git server to
