If this is the case, you may want to change your password, as it is known that weak passwords are a common weak point in an online system. Follow the steps below to change your account password to a strong one: Windows XP & Vista Open the Start menu and click on 'Control Panel' Under the 'Security' tab, click on 'User Accounts' On the next screen, click on 'Change your password' Note: This functionality is only available if you have administrator privileges. Windows 7 Open Start Menu Click on 'Control Panel' Click on 'User Accounts' Click on 'Change your password' Google Google Chrome on MacOSX: Google Chrome on Windows & MacOSX: If the same issue happens on Google Chrome or Google Play, it could be a sign that the Google account is in trouble, so we would recommend you to visit the Google help page to change the password and make it stronger, before trying to recover it. Helpful Tips: Always use a strong password. Use a strong password that is not used by another account on your computer. Change it often to avoid hackers. Don't use the same password for all accounts. Don't use any personal information. Check your password when you are logging in to a new account. Log into Gmail while you are logged in to any other Google account. Check your password at least once a week. Turn on two-factor authentication. Install SSL certificates on your site or your email service provider. Don't use the same password for different sites. Check your inbox, social media accounts, any emails that require you to enter a password. Don't use your password for any site. Don't use the same password for both your email and social media accounts. Use one-time passwords for your email and the only one social media account. Don't use your password on any other site that requires you to enter your password. 6d1f23a050
