18-09-2019, 03:47 VAG EEPROM Programmer 1.19g How to download software to your PC? - Free download manager pro 2.0.1.2! 28-02-2013, 09:01 Viagra 25mg visa There is no perfect answer, but given that when someone gets banned from one network it's not exactly the end of the world, I personally don't take too much notice. But I guess that's a question of personal choice (as you'd expect). For example; BBS software can be a little more "pester-y" than internet software, so I tend to stick to bbs software as much as I can, but when I have to I can always get onto an internet forum and network, no problem. If you're planning a career with computers though, internet software will definitely give you more opportunities. If you're planning to just learn at home and use the internet, then I'd be more inclined to agree with what James says. Like I said, the internet is a lot more "hassle-free" and I find it way easier to get anything I want done. Hope that helps. I don't think you'll get a simple answer because it really varies from person to person.

I have read the VAG manual several times, and thought i could program the eeprom using the VCDS-19 that came in the package with the car. My programming went well, and I have managed to upload a programme onto the eeprom. However, during the process, it started smoking and was filled with lots of white smoke and odd sounding noises. I had to remove the wires and shut it down immediately. At this
