You can download this file under Windows 10 in Windows XP compatibility mode. If that doesn't work, you'll have to uninstall the program and install it again. Also, if you're already using Windows 10, this won't work. You will need to uninstall the old version and install it. Windows 10 also has an automatic update feature, so you might want to try installing it again.

Inhaled corticosteroid treatment and the subsequent risk of fracture in the elderly: the Study of Osteoporotic Fractures. We conducted a randomized, double-blind, placebo-controlled trial in older women to examine the effect of daily inhaled fluticasone, a corticosteroid, on the subsequent risk of fracture. Subjects were women from five geographic areas, ages  $\geq 60$  years and not taking corticosteroids, who were randomized to receive daily inhaled placebo ( $n = 2,284$ ) or inhaled fluticasone propionate, 500 micrograms ( $n = 2,283$ ). Fracture incidence during 2 years of follow-up was compared. In a planned secondary analysis, the effect of fluticasone on the risk of fracture was compared according to the use of postmenopausal hormones. Over 2 years, the incidence of fracture of the hip, wrist, or spine was low in both groups; no significant differences were found between the groups. The use of fluticasone was associated with a modest increase in the risk of any fracture (relative risk [RR], 1.19; 95% CI, 1.05 to 1.34;  $P = .007$ ) and no significant differences in risk by anatomic site, using the same threshold of significance. The only significant effect of fluticasone in subjects receiving hormones was an increase in the risk of vertebral fracture (RR, 1.60; 95% CI, 1.02 to 2.50;  $P = .04$ ). In this trial, daily inhaled fluticasone, 500 micrograms, was not associated with increased fracture risk in older women. However, the observed increase in the risk of vertebral fracture in subjects using fluticasone may be clinically meaningful. Yet there's something about the nominations that's even more memorable and important: the albums that didn't make it in the short list. I can think of a few.
