have noticed that the site doesn't handle fragmentation properly. Even if I search for phases or phases-1, I don't get the right results. I would suggest merging the tags phase-1, phase-2, and phase-3, into phase. This will also give us a single tag for the part-1, part-2, and part-3 tags. A: As explained in comments, this is automatic (and we're 100% certain to do it) when closing a question that has existing parts. Your question is unique because the number of parts is not quite high enough for it to be automatic, so we did not close it. (I

didn't even notice it until you pointed it out. We just do not normally do this.) Q: Why an array cannot have multiple pointer value?

Why it is a design decision that arrays can have only single set of pointer values for all the elements,

So you can't do this: `char *p1 = "Hello"; char *p2 = "World"; char *p3 = "Hello World"; char *p4 = "stack";`

I just don't know the purpose of
