the first edition of this book was released in 1996, it was written for my own use & testing and as an aid to my lectures. since then, a great deal has happened and this version has been rewritten and updated to reflect the current world. the front matter and table of contents remain the same and i am not going to rewrite them. i would like to extend a special thanks to oliver boyd, who assisted in making this version possible. i would also like to thank james morison for his support and encouragement, and for providing me with the data for my poverty section. this version is the best version of the book to date. it fixes all of the errors and has been properly prepared for print. since the book is very long, i have tried to get some of the errors corrected at the earliest possible time, but there were some that could not be fixed as they were caused by a missing paragraph at the point of corruption. this file is compiled from the course notes. however some of the items in the notes have been reformatted for easier reading & editing. this version was created using various programs, but most was done in microsoft word. while it is still preferred, you can also download the program to see what's going on. registration (no time limits) register free instead of getting a 'coupon' and access basic reports easier to search for previous visitors need to learn more about site issues? here functional report down list allows you to select which report you want to run and a lot more we think it's worth a try to see if you can share your thoughts on this free download.. "if you've got the time and patience to read this, and don't mind doing a little extra research, then do it." by reading this report, you can see how i think, so reading is like consuming my knowledge and experience. if you'd like to leave us an 'average rating', then please do. i'll be reviewing your responses over a period of time. you can check back here to see if it's any use.
