Edition.BayGenie.Auction.Sniper.Pro.v3.3.5.4-TE.Te.rar.Q: how
to prepare properties file for jar I have a simple html/css
program that i need to run in multiple locations. I want to
create a properties file with the path to the java file (the code)
which can be then moved to a tftp so every server can use it. I
already know how to run a simple java file with arguments, but
how can i include the properties file? public class html { public
static void main(String[] args) {
java.lang.System.out.println("Hello World"); } } I would like to
put this program inside a jar, but dont know how to include the
properties file that i will put on the server. A: You have two
ways to run your JAR: 1) In a Java application environment, you
can use the Properties class to load the path from the resources
directory of the JAR file: Properties properties = new
Properties(); // Load the properties file: InputStream
inputStream =
this.getClass().getResourceAsStream("/my.properties");
properties.load(inputStream); // Get the String value of the
property: String myProperty =
properties.getProperty("my.property"); 2) From the command
line in a shell (bash, cmd, etc.) The Properties class has a
readExternal method that can read properties from a file. If the
file is in the root of the JAR file, it's load() would work as above.
If it's in the specific JAR file you're
