

Small Business System Crack+ Full Version

This software is a suite of applications aimed at providing basic functionalities / features to small businesses. It is not aimed to compete with enterprise level of applications therefore the price, amount of features and capabilities is kept to basic level. This software was designed to help start up company, home office, company operated from home or company with less than 100 people. There are 6 modules in this software:
[] Customer Relationship Management (CRM) module: CRM is a module that stores information related to other companies that you deal with, whether it be your supplier, client, wholesaler, or something else. It keeps track of contacts within that company, any history or conversation that you might have, opportunities, and documentation that might be relevant.
[] Product module: this module keep track of your stock or products that you sell, it has inventory level and the future release might incorporate Point of Sale module that links back the product module so as the goods are sold you can know exactly, in real time, what your stock level is.
[] Quotation module: this module when combined with product module making issuing quotation a breeze. The line item is taking its content from product table. It uses Crystal Report to product the quotation report. This helps company to have a standardised quotation template and tracking its potential sales.
[] Invoice module: Invoice module is similar with quotation module, it keeps track invoices that have been generated. You can specify a template for invoicing so it can generate invoice at your request.
[] Personnel module: this module keeps the information of your staff members. It also keeps track of any history you might want to record, leaves, and also qualifications. This is primarily useful for business who needs to keep track of qualifications of their staff members to ensure that they're always up-to-date.
[] Invoicing module: Invoicing module is similar with quote module, it keeps track invoices that have been generated. You can specify a template for invoicing so it can generate invoice at your request.
[] Billing module: this module keeps track of your customer's payment that has been made, this could be monthly, weekly, daily, and even hourly as the bill.
Small Business System Installation: Small Business System Installation is a file based, so it will be as simple as a click and installation. You can upload files of CRM, Products, Quotation, Invoicing
