Now that I've had a week or so off from studying, I have a headache from hell. Not just a headache, but an all-day long headache, which is in turn a weird combination of a migraine and a sinus infection. There's no use in getting any kind of relief though, because with an ever growing headache I'll just end up with even more of it. Of course I've tried not to drink anything or eat anything, because if I have another headache it's all over. I can't even have a good sleep for fear of waking up with more of it. I have managed to avoid studying like this. I have the next two weeks off, so I hope the headache will go away soon. I received my first Sigma 70-300 F4.5-6.3 DG OS HSM lens the other day. It's quite a beauty, and I can already see that I'll be doing a lot of testing with it. But at this point I must admit that I'm not entirely happy with the build quality. I have been using my 300mm lens for two weeks now, and after handling it for the first time I have to say that it has a good weight to it. Like a real piece of work which can withstand any kind of weather. It's durable, well made, and definitely seems like it will last for a long time. The only problem with it is that I can't
