Field of the Invention The present invention relates to a clock output unit, a clock output method, a semiconductor device, and a computer-readable storage medium. 2. Description of the Related Art In the related art, it is common that a plurality of semiconductor devices (circuits) and a clock output unit are mounted on one package. The semiconductor devices output an internal clock signal to the clock output unit. The clock output unit outputs the clock signal to the outside via an external terminal. The semiconductor devices are controlled by a control circuit (hereinafter, referred
