FaceFilter Pro 3.02.1821.1.Full-time study for the masters of science in chemistry at the University of Oxford Course description Chemistry (MSci) is the best-known science, as chemistry has a central role in our lives. The subject is the study of the structure and behaviour of atoms and molecules, as well as their reactions and interactions. The chemical reactions that occur in our bodies are central to our health and longevity. Chemistry provides the best explanation for the existence and stability of life. Therefore, it should be the foundation of our understanding of the physical universe. The MSci in Chemistry is a full-time, two-year course which leads to an MPhil degree in Chemistry. There is a strong inter-disciplinary emphasis and emphasis on the importance of both the individual sciences and of working together. Many of the elements of the course may be learnt through independent study or through the use of a tutorial system. We aim to ensure that each undergraduate student is given an individual, holistic view of chemistry, with the combined disciplines of chemistry, biology and physics. The course has three cores; the first two are taught jointly and a f988f36e3a
